

**PRESS RELEASE**

11 September 2013

## Modulated DPSSL option for 04-01 Series Lasers

**Warsash Scientific** are pleased to announce a modulated DPSSL option for the 04-01 Series lasers is now available from **Cobolt**.

This option incorporates both a diode pumped solid state laser (DPSSL) and an Acousto Optic Modulator (AOM) in one single, compact package slightly longer than the standard 04-01 Series laser head, allowing fast and effective integration of a modulated DPSSL without the need for bulky and time consuming external alignment. By relieving the customers of the complex and sensitive alignment process, they will save time to focus on being more productive in research or system construction.

- Available with a perfect beam and all the high-performance specifications associated with DPSSLs
- High modulation speed of up to 3MHz with the ease of integration of a diode laser module
- High extinction ratio of >OD5 when fibre coupled
- 12 months system warranty and 24 months laser head warranty

For more information, contact Warsash Scientific on +61 2 9319 0122 or [sales@warsash.com.au](mailto:sales@warsash.com.au).
