

PRESS RELEASE
06 November 2012

CRAIC Microspectrometer Software Compatible with Windows 8

***CRAIC Technologies**, the leading innovator of UV-visible-NIR microspectroscopy solutions for science and industry, announced Windows™ 8 compatibility of its MINERVA microspectrometer control and spectral analysis software.*

Scientists and engineers using MINERVA running on Windows 8 will immediately notice a more fluid response, with Windows 8's newly enhanced stability and advanced memory management. Windows 8 will further improve the useability of CRAIC's MINERVA microspectrometer software with such features a quick resizing of windows, easier to see icons and speedy access to often used documents and spectra. Windows Search gives engineers and scientists even more power as a fast search engine to locate and quickly analyse data. And best of all, Windows 8 is designed to more efficiently use resources allowing for even better operation of CRAIC microspectrophotometers.
