

PRESS RELEASE

06 November 2012

Protect Your Hands with New Laser Gloves

*Laservision is the first manufacturer of laser safety equipment to offer a certified laser protection glove. Gloves protect at 800nm – 1100nm and are available from **Warsash Scientific** in Australia and New Zealand.*

Due to the increasing application of high power hand guided laser systems, this kind of working protection has become more and more important. The Laser Glove is a 5-finger glove featuring a certified resistance of 40kW/m² against laser radiation of 1064nm before exceeding the MPE Skin-Value. The innovative coating of the finger tips and palm protects delicate laser optics and optical elements from sweat and other liquids.

KEY FEATURES

- Certified laser safe glove
- Patented Profas Bamboo TwinFlex[®] Technology
- Innovative liquid-tight SoftGrip, High-Performance-Elastomer (HPE) Coating
- Excellent temperature isolation
