Power Meters, Light Sources & Loss Test Sets

Recently **Kingfisher** released the new KI2000 range of power meters, light sources and loss test sets. The range is feature-rich, boasting easy to read screens, fast operation, and a 3 year warranty.

LIGHT SOURCE FEATURES

- All battery options: Either 2 x AA Alkaline with external power via micro USB. Or 2 x AA rechargeable with on board charging via micro USB.
- LED / Laser options for all applications. Up to 6 assorted sources per instrument.
- Unique Encircled Flux compliant MM sources, for improved test consistency.
- VisiTest option mixes a VFL with the test source in Autotest, or use as a VFL.
- Eye safe.
- Practical interchangeable adaptors including LC.
- Autotest compatibility with all other old/new Autotest equipment.
- Excellent general stability.
- Zero-Warm-Up variant for high precision, high volume or adverse environment applications.
- Slim and attractive unit with large backlit 3 line display.
- Multi-Fibre ID.

POWER METERS FEATURES

- All battery options: Either 2 x AA Alkaline with external power via micro USB. Or 2 x AA rechargeable with on board charging via micro USB.
- Detector options to cover all wavelengths & power levels from +33 to -70 dBm
- Large area detectors for POF, MPO/MTP etc.
- Excellent accuracy, with over 20 calibrated wavelengths.
- Autotest compatibility with all other old / new Autotest equipment.
- Extensive memory features: USB key dump, timestamp, text name, KITS software
- Slow / averaging mode, Multi-Fibre ID.
- Large 3 line backlit display for easy operation
- Very long battery life (1000 hrs)
- KITS software works in any language supported by Microsoft
- VFL option

LOSS TEST SET FEATURES

These loss test sets combine the source and meter features, however there is one significant additional item of note: These loss test sets are about 50% slimmer than equivalent competitor units, which are too thick for small hands.
