

PRESS RELEASE

21st February 2012

TruNarc™ Handheld Narcotics Identification System

Identification of suspected narcotics is a critical challenge for law enforcement agencies. With the Thermo Scientific TruNarc™ analyser from Warsash Scientific, narcotics officers, customs, border patrol, and other law enforcement personnel can scan a sample for multiple narcotics in one single test.

Lightweight and easy to use, the TruNarc device delivers fast and accurate narcotics analysis anywhere it's needed. It easily identifies narcotics, stimulants, depressants, hallucinogens and analgesics using lab-proven Raman spectroscopy. The TruNarc device is able to analyse key drugs of abuse as well as common cutting agents, precursors and emerging threats — ensuring that law enforcement personnel are always ahead of the curve.

Once a substance is analysed, full results are automatically captured for reporting and evidence. Rapid results combined with automated reports can streamline the path to prosecution, reducing administrative burden and dramatically impacting the time and expense of drug-related arrests.

KEY BENEFITS

- Fast, accurate identification
- Based on lab-proven Raman spectroscopy
- Easy to use
- Intuitive menu-driven interface enables fast training and proficiency
- Single test, multiple narcotics
- Non-contact sampling
- Scans directly through plastic or glass to minimise contamination, reduce exposure and preserve evidence
- Automated, tamper-proof records

For more information on TruNarc or other handheld Raman instrumentation, contact Warsash Scientific on +61 2 9319 0122 or sales@warsash.com.au.
