

PRESS RELEASE
10 July 2012

Portalevel MAX®: Ultrasonic Liquid Level Indicator

After two years in development, **Coltraco** launched the Portalevel® MAX at the prestigious maritime exhibition, Posidonia. Portalevel MAX is the next generation portable liquid level indicator for monitoring fire suppression systems comprising CO₂, FM200™, NOVEC™, Halons, and other liquid-based Halon replacement extinguishants. It employs easy-to-use, clean, environmentally-safe ultrasonic technology.

For over 20 years Coltraco has pioneered the deployment of portable ultrasonic liquid level indicators globally with Naval, Shipping, Offshore-Petrochemical, Power-Generating and Fire Safety Engineering users across 105 countries. Portalevel MAX uses 8th generation technology, embodying the best of the Royal Naval and Admiralty Research traditions.

KEY FEATURES

- Single-touch calibration feature for speed of use
- Backlit, user-friendly LCD display for clear operation in dark environments
- Four different power settings for a wide variety of cylinder material applications
- Instant, definitive results through the "calibration-and-proceed-to-test" control
- Advanced technology for ease of use
- Durable, ergonomic metal case design fits easily into the hand
- Works on a wide range of cylinder sizes and liquids or liquid gases
- Optional range of accessories and through-life total care maintenance options

Permalevel™, a fixed monitoring system for 24/7 monitoring of fire suppression cylinders, is also available.

For more information in regards to ultrasonic liquid indicators, contact **Warsash Scientific** on +61 2 9319 0122 or sales@warsash.com.au.
