

Environmental Policy

Last Updated 24/07/2023

At Warsash Scientific, we recognise the importance of environmental stewardship and sustainable practices in all aspects of our operations, particularly the purchasing and delivery of scientific equipment. We are committed to reducing our environmental impact and contributing to a more sustainable future.

To achieve this goal, we will:

1. Prioritise the purchase of equipment that has been designed and manufactured with environmentally sustainable practices in mind, such as energy-efficient models with reduced carbon emissions.
2. Consider the entire lifecycle of the equipment, including its manufacturing, use, and disposal, when making purchasing decisions. We will prioritise equipment with long-lasting and recyclable components to reduce waste.
3. Encourage our suppliers to implement environmentally sustainable practices in their own operations and to provide detailed information about the environmental impact of their products and services.
4. Optimise our delivery routes and consolidate shipments where possible to reduce transportation-related carbon emissions.
5. Work with our delivery partners to ensure that equipment is delivered in an environmentally responsible manner, with a focus on reducing packaging waste and using recycled materials.
6. Regularly review and update our environmental policy to ensure that we are continually improving our environmental performance and minimising our impact on the planet.

By implementing these practices, we believe we can make a meaningful contribution to creating a more sustainable future for our planet.
