

PRESS RELEASE

11 October 2017

C-FLEX laser combiner from HÜBNER

Warsash Scientific is pleased to announce the C-FLEX from HÜBNER Photonics, a leading manufacturer of laser, terahertz and radar system solutions.

The C-FLEX is a highly-flexible and extremely compact laser combiner that lets you combine up to six wavelengths from a possible 30 commercially available wavelengths from different laser manufacturers. The lasers can be controlled either separately or via a common USB port. The C-FLEX is field upgradable for when additional lasers are purchased. Individual AOM modulators can be integrated to five of the wavelengths for fast modulation of DPSS lasers. Free space or fiber coupling of the output is available.

Applications include:

- Fluorescence microscopy
- Flow cytometry
- Optogenetics
- Single particle spectroscopy
- Photochemistry

For more information, contact Warsash Scientific on +61 2 9319 0122 or sales@warsash.com.au.
